MONDO TOYS CATALOGUE • SPRING SUMMER 2021

SPRING SUMMER 2021

MONDO

Sustainability

SETTING NEW STANDARDS...

Mondo recently built up a new company policy which includes **environmental sustainability** goals to minimize and reuse waste as a raw material, improve energy efficiency, reduce greenhouse gas (GHG) emissions.

This important investment is finalize to move from a linear to a **circular economy**, an economic system planned to reuse materials in subsequent production cycles, minimizing waste.

The prospect in future years is to reach an **ever higher sustainability target** as the project was born following this corporate sustainability policy.
Mondo, in detail, has been working to find solutions to substitute its plastic materials with more eco-friendly options, presenting for 2021 two distinct projects to take us closer to the ultimate goal of full eco-compatibility of our materials.

BioBall

ReNew Toys

Respect for nature is the message Mondo wants to pursue: a concrete and real commitment in order to contribute to the growth and the education of the new generations.

ReNew Toys

From 2021, Mondo's hard plastics's products will be manufactured using **a new formula**, which include standard material and **FOOD-GRADE PRE-CONSUMER RECYCLED MATERIAL**. Food grade plastics cannot contain dyes or other additives deemed harmful to humans. This will enhance the chemical safety of our toys, often used by toddlers, beyond the current toy requirements.

TWO ADVANTAGES:

FOOD GRADE

This new recycled material is sourced from a leading food manufacturer. Having a sole supplier allows us to have a **controllable source of raw material** of the highest standard. Mondo always guarantees high quality materials in accordance with the targets of the Toy Safety Directive 2009/48/EC and the REACH regulation. The material undergoes a MECHANICAL recovery treatment without chemical additives to preserve its physical-chemical characteristics.

RECYCLE

By using a recycled material, we are able to **reduce our impact on the environment**.

MATERIAL CARBON FOOTPRINT REDUCTION:
- 0.9 Kg CO_2 are saved per Kg of material used
- Each bucket set saves abt. 160 gr of CO_2

MONDO'S YEARLY GHG NET EMISSIONS WILL BE REDUCED BY 600 tonnes of CO_2 eq.

HOW TO COMMUNICATE?

POS

Dedicated material available on demand.

ReNew Toys

Mondo registered logo
(to be reproduced on all buckets, accessories, paddles, playground equipment).

BioBall

From 2021, Mondo's pvc play balls production will be made using a **NEW BIO-BASED FORMULA**, which replaces 50% of fossil-derived substances with a **RENEWABLE SOURCED PLANT BASED DERIVATIVE: this is completely recyclable.** The product will have a higher play value due to the best elasticity characteristics obtained and with an **ENVIRONMENTAL IMPACT** reduced to 50%.

TWO ADVANTAGES:

The new 2021 product can be totally Phthalate Free

- **Children safety**
- **Environment protection**

The production process of the bio balls has a positive impact on CO_2 emissions

Ex: playball 23 cm

- 1.2 Kg CO_2 are saved for material used
- Each 23 cm PVC play ball saves abt.120 gr of CO_2

MONDO'S YEARLY NET EMISSIONS WILL BE REDUCED BY 2000 tonnes of CO_2 eq.

HOW TO COMMUNICATE?

BioBall Mondo registered logo to be reproduced on all playballs and related materials.

OK biobased | TÜV AUSTRIA ★★ S2004

TUV Austria logo certifying Mondo biobased product (released after radiocarbon test on Mondo production) to be reproduced on all playballs.

ISTRUZIONI DI GONFIAGGIO

I nostri calibri sono tarati e collaudati per lavorare ad una pressione che va dalle 4 atm. alle 5 atm.
Appena raggiunto il diametro precedentemente scelto sull'asta graduata, la parte superiore del pallone in fase di gonfiaggio solleverà la leva 1 che chiudendo la valvola 2 farà cessare il flusso dell'aria.
1 Leva che comanda attraverso l'apertura e la chiusura della valvola 2 l'afflusso dell'aria all'ago.
3 Viti di fine corsa del basculaggio della leva 1, da regolare solo in caso di imperfetto funzionamento della valvola 2.
4 Asta graduata, riportante i vari diametri di gonfiaggio dei palloni.
5 Manopola per il bloccaggio dell'attrezzo sul diametro desiderato che deve leggersi attraverso il foro e combaciare con le righe segnate di fianco.

Lubrificare l'ago di gonfiaggio con acqua e sapone o acqua e silicone. Inserire l'ago nel foro ed abbassare la leva 1 in modo da aprire la valvola 2 e far affluire l'aria al pallone. Estrarre l'ago dal foro del pallone.

INSTRUCTIONS DE GONFLAGE

Nos calibres sont tarés et essayés pour travailler sous une pression comprise entre 4 atm. et 5 atm.
Une fois le diamètre choisi sur la tige graduée atteint, la partie supérieure du ballon en cours de gonflage soulève le levier 1 qui ferme la valve 2 et arrête ainsi tout floux d'air.
1 Levier de commande par le biais de l'ouverture et de la fermeture de la valve 2 du flux d'air à l'aiguille.
3 Vis de fin course de course du basculement du levier 1; a régler uniquement en cas de mauvais fonctionnement de la valve 2.
4 Tige graduée, avec indication des différents diamètre de gonflage des ballons.
5 Manette pour le blocage de l'outil sur le diamètre souhaité qui doit être lu à travers l'orifice et doit coïncider avec les lignes marquées sur le côté.

Lubrifier l'aiguille de gonflage avec de l'eau savonneuse ou l'eau et de la silicone. Introduire l'aiguille dans l'orifice et abaisser le levier 1 pour ouvrir la valve 2 et laisser l'air s'écouler dans le ballon. Retirer l'aiguille de l'orifice du ballon.

INFLATING INSTRUCTION

Our gauges are calibrated and tested to work at a pressure of between 4 atm. and 5 atm.
As soon as the diameter previously selected on the graduated rod has been reached, the upper part of the ball that is being inflated pushes up level 1, which, in its turn, closes valve 2 and stops the inflow of air.
1 Lever that controls the inflow of air through the needle by opening and closing valve 2.
3 End of travel screws fot the movement of level 1, to be adjusted only in the event of valve 2 malfunctioning.
4 Graduated rod, showing the varius inflation diameters of the balls.
5 Knob to lock the tool on the desired diameter, which must appear through the hole and coincide with the lines marked to the side.

Lubricate the inflation needle with soapy water or water and silicone. Introduce the needle into the hole and lower lever 1 in order to open valve 2 and start the inflow of air into the ball. Pull out the needle from the hole in the ball.

ANWEISUNG ZUM AUFPUMPEN

Unsere Messlehren sind so geeicht und geprüft, dass sie bei einem Druck von 4 atm bis 5 atm arbeiten können. Sobald der Durchmesser erreicht ist, der vorher am Stab mit der skala eingestellt wurde, herbt der obere Teil des aufgepumpten Balls Hebel 1 an, so dass dieser das Ventil 2 schließt und der Luftstrom unterbrochen wird.
1 Hebel, der über das Öffnen und Schließen von Ventil 2 den Zustrom der luft in die Nadel steuert.
3 Schrauben am Endanschlag des Hubs von Hebel 1. Sie sollten nur reguliert werden, wenn Ventil 2 nicht richtig funktioniert.
4 Stab mit Skala, fut den Durchmesser der aufgepumpten bälle.
5 Feststellgriff für das Werkzeug auf dem gewünschten Durchmesser, der durch das Loch abgelesen werden und mit den seitlich markierten Linien übereinstimmen muss.

Die Pumpnadel mit Wasser und Seife oder Wasser und Silikon schmieren. Die Nadel in das Loch einfüren und Hebel 1 absenken, so dass Ventil 2 geöffnet wird und Luft in den Ball strömt. Die Nadel aus dem Loch im Ball herausziehen.

INSTRUCCIONES PARA EL HINCHADO DE BALONES

Nuestros calibres estàn graduados y ensayados para trabajar a una presión de 4 a 5 atm.
No bien alcanzado el diámetro anteriormente elegido sobre la varilla graduada, la parte superior del balón en fase de hinchado levantará la palanca 1 la cual, cerrando la válvula 2, hará cesar el flujo del aire.
1 Palanca que manda, a través, de la apertura y el cierre de la válvula 2, el flujo de aire de la aguja.
3 Tornillos de final de carrera de basculación de la palanca 1, a regular sólo en caso de imperfecto funcionamiento de la válvula 2.
4 Varilla graduada que indica los varios diámetros de hinchado de los balones.
5 Pomo para el bloqueo del dispositivo sobre el diámetro deseado que se debe leer a través del orificio y coincidir con las lineas indicadas al lado.

Lubrique la aguja de hinchado con agua y jabón a agua y silicona. Introduzca la aguja en el orificio y baje la palanca 1 de modo que se abra la válvula 2 y haga fluir al aire en el balón. Extraiga la aguja de orificio del balón.

09951
Dimension: 15 x 30 x 43 cm (l x w x h)
Box: 1 pc - 0,02 m^3

09948
Dimension: 29 x 18 x 12 cm (l x w x h)
Single Pack: 30.5 x 18.5 x 14.5 cm (l x w x h)
Box: 6 pcs - 0,06 m^3

Verificare frequentemente il livello dell'olio del compressore e attenersi scrupolosamente alle sue norme di uso e manutenzione.

Vérifier fréquemment le niveau de l'huile du compresseur et suivre scrupuleusement les instructions d'emploi et d'entretien.

Check frequently the compressor oil level and strictly observe instructions for use and maintenance.

Überprüfen Sie regelmäßig den Ölstand des Kompressor, und halten Sie sich genau and die Bedienung - und Wartungsanweisungen.

Contrólese frecuentemente el nivel de aceite del compresor y siganse con todo cuidado las normas de uso y mantenimiento.

09950 - AIR COMPRESSOR
Dimension: 24 lt.
Box: 1 pc - 0,100 m^3

IMPORTANT

Il gonfiaggio deve essere eseguito in un ambiente dove la temperatura non sia inferiore ai 15-20° C, essendo i palloni fabbricati con materiale termoplastico che si indurisce con l'abbassamento della temperatura.

Le gonflage doit être effectué dans un endoit ou la température ne soit pas inférieure à 15-20° C puisque les ballons sont réalisés avec un matériel thermoplastique qui se durcit avec l'abaissement de la température.

Balls must be inflated when the temperature is no lower the 15-20° C, as the balls are made of the thermoplastic material that hardens when the temperature drops.

Das Aufpumpen sollte in einem Raum stattafinden, dessen Temperatur nicht weniger als 15-20° C beträgt, da die Bälle aus thermoplastischem Material hergestellt sind und dieses sich bei niedrigen Temperaturen erhärtet.

El hinchado tiene que efectuarse en un medio ambiente donde la temperatura no sea inferior a 15-20° C, ya que los balones estàn fabricados con material termoplástico que se endurece con la disminución de la temperatura.

NOTE

PALLONI SGONFI
- Ogni pallone è dotato di vavola di rigonfiaggio e di retina singola.
- Ogni cartone contiene sacchetti di nylon per 12 palloni gonfi.

BALLONS DEGONFLES
- Chaque ballon est muni de valve de gonflage et de filet individuel.
- Chaque carton contien des sachets en nylon pour 12 ballons gonflés.

DEFLATED BALLS
- Each ball is equipped with a reinflation valve and individual net.
- Each carton contains nylon bags for 12 inflated balls.

LUFTLEERE BÄLLE
- Jeder Ball ist mit einem Pumpventil und einem Eizelnetz ausgestattet.
- Jeder Karton enthält Nylonsäcke für 12 aufgepumpte Bälle.

BALONES DESINFLATOS
- Cada balón está dotado de válvula de rehinchado y de retina individual.
- Cada cartón contiene bolsitas de nailon para 12 balones hinchados.
